

HabiShield™

ANIMAL HYGIENE DRYING POWDER with Chlorine Dioxide Technology

Protecting the Defenseless

The first few hours of life are critical in the lifetime performance of an animal, especially as it is exposed to an array of disease-causing pathogens and environmental stresses.

Introducing HabiShield™ - An Antimicrobial / Super Absorbent protection system that offers immediate protection in two critical areas:

1. Protecting a newborn against disease causing pathogens
2. Immediately drying the newborn animal

HOW DOES HabiShield™ WORK?

HabiShield™

WHY HabiShield™?

- Drying helps a newborn to better regulate its body temperature. Otherwise, heat is removed from the animal as the water evaporates.
- This leaves the newborn highly susceptible to chilling, and wastes the newborn's energy.
- Young animals have little subcutaneous fat, which leaves them with minimal insulation.
- Newborns with poor respiration also struggle more to regulate their temperature.

PART #	DESCRIPTION
ACEZ160	HABISHIELD™ SHAKER – 6.5 lbs. (2.9 kg)
ACEZ035	HABISHIELD™ POWDER – 35 lbs. (15.8 kg)
ACEZ090	HABISHIELD™ POWDER – 90 lbs. (40.8 kg)
